

### Leakage Analysis Workshop (LAW) Server Requirements

---

*Note: This checklist assumes that Microsoft SQL Server 2005 and LAW 2.0 or higher have been installed on the server. Detailed instructions for this procedure are available from Trilithic; contact the Applications Engineering department at (317) 423-6699 if you need them.*

Ensure that the server has a static IP address

Make sure port 80 is open

*(The server must be accessible from the web and must be able to communicate with Trilithic's verification server)*

Create a LAW instance

*(While on the server, open the LAW Instance Manager: Start/Programs/Trilithic LAW/LAW Instance Manager. See the LAW Operation Manual for detailed instructions.)*

Verify that the LAW server can be accessed from the web

### LAW Software Setup Checklist

*(Note: The following checklist assumes that the LAW software has been installed on the server, an instance has been created, and that the initial login page can be reached via the web page. Also, this is merely a progress checklist suggesting the steps to be taken in the initial setup, and the order in which the steps should be performed. Refer to the LAW Operation Manual for detailed instructions on completing these steps.)*

Set up users

*(Administration menu, manage users)*

Set up communities

*(Administration menu, community definition)*

Enter configuration settings

*(Administration menu, configuration)*

Assign users to communities

*(Administration menu, manage users)*

---

Leakage Analysis Workshop (LAW) Server  
Requirements  
P/N 0010275050 – Rev 02/09

1 of 2

- Schedule a batch process  
*(Administration menu, batch schedule)*
- Configure Seekers and MCAs  
*(Seeker Setup software)*
- Perform the rideout
- Upload data from the Seeker/MCA  
*(Wi-Fi from MCA or manual upload from Seeker)*
- Check to ensure leaks are populated and work orders were generated  
*(LAW, Mapping Tool---may have to wait 24 hours from initial upload for batch processing)*

At this point, LAW should be up and running. Please contact Trilithic's Applications Engineering department at (317) 423-6699 for additional support.
