New Product Release: Compact LC BP Filters Compact size and rugged construction for the Iridium Telephony Band

INDIANAPOLIS, IN. (Wednesday, October 7, 2009) –Trilithic, Inc. a market leader in RF and Microwave Components has released a new series of Compact LC BP filters for the Iridium telephony band. This pole placed bandpass filter passes the 1616.0 -1626.5 MHz band with a maximum insertion loss of 2.6 dB while providing a minimum of 15 dB of isolation at GPS L1 and 70 dB minimum at GPS L2. It also provides 45 dB of isolation at 1710-1850 MHz band and 55 dB beyond that out to 10 GHz. Both connectorized and PCB mount versions are available.

Its small size (0.5" x 0.5" x 2.00") and rugged construction make it suitable for a variety of airborne applications, particularly UAV/UAS platforms or any other application where minimal size and weight are important. Other frequency bands and isolation requirements can be accommodated to fulfill your specific requirements.

Standard Delivery is 5-6 weeks.

###

ABOUT TRILITHIC:

Trilithic, Inc. is an industry leader providing telecommunications solutions for major Broadband and RF & Microwave markets around the world. Key product groups include instruments and service assurance systems for major Broadband providers; RF and Microwave components and subsystems for cellular, military communications and many other wireless industries; and government-mandated Emergency Alert Systems used by HFC service providers and broadcasters in the United States. In all of these industries, Trilithic has earned a reputation for innovation, technical performance and flexibility in meeting customers' exacting requirements.
