### **New Product Release: WiMax Power Dividers** Wide band performance in compact packages

**INDIANAPOLIS, IN. (Thursday, June 25, 2009)** – Trilithic, Inc. a market leader in RF and Microwave Components has released a new series of WiMax power dividers featuring frequencies from 0.8-6GHz. These Wilkinson designs use single or multistage layouts including 2-way ,4-way and 6-way configurations. These wide band Power Dividers feature 18dB of Isolation and SMA connectors on all ports. Wilkinson Power Dividers are used in applications that require distribution of the RF signal such as Antenna sharing, test & verification lab environments and in-building installations. All units are RoHS compliant and most models ship from stock.

###

#### **ABOUT TRILITHIC:**

Trilithic is a leading provider of telecommunications solutions for broadband, broadcast, RF and microwave markets around the world. The three major divisions include: *Broadband Instruments* for testing and quality management in major cable television systems; **RF & Microwave components** and subsystems for cellular, wireless and military communications applications; and *Emergency Alert Systems* for government-mandated use in cable and broadcast markets in the U.S.
