Trilithic 860 DSPi and Conrad Data Systems DPET Integration

Indianapolis, IN (Wednesday, June 15, 2005)-Trilithic Inc and Conrad Data Systems Inc are pleased to announce integration of Conrad's DPET Settop Testing Application with Trilithic's 860 DSPi Field Analyzer. Users of the 860 DSPi will now be able to use data and displays provided by DPET to unobtrusively test digital settop performance. Very importantly, the integration includes means to record settop installation and test activities, and to document procedural compliance. The displays and functions of the DPET system are accessible by any authorized 860 DSPi with the onboard browser.

Please join us at the Cable Tec Expo in San Antonio, Texas June 15-17.

Trilithic's Booth is # 5066

ABOUT TRILITHIC: Trilithic, Inc. is an industry leader providing telecommunications solutions for major Broadband and RF & Microwave markets around the world. Comprised of three major divisions: Broadband Instruments & Systems offers test, analysis and quality management solutions for the major cable television systems around the world. The RF & Microwave Components Division provides various components and custom subsystems for companies specializing in cellular, military and other wireless applications. The E.A.S. Division is a leading supplier of government-mandated Emergency Alert Systems used by HFC service providers in the United States.

Trilithic has continuously expanded its manufacturing capabilities to accommodate the greater demand for its products, both through streamlining design and development and automating manufacturing and test procedures. Trilithic provides a broad product base of over 1500 measurement products and communications components to thousands of customers around the world. The company's state-of-the-art 120,000 Square Foot worldwide headquarters is located in Indianapolis Indiana. As an **ISO 9001:2000 certified** company with over 40 years of collective expertise in engineering and custom assembly, Trilithic is dedicated to providing quality products, services and communications solutions that meet and exceed their customers' expectations.

ABOUT CONRAD DATA SYSTEMS INC has been providing software development services for over 20 years. In 1996, Conrad's efforts were re-focused on providing assistance to Cable Operators within the emerging digital services arena. In addition to project management and technical engineering services, the company in 1999 developed the Digital Productivity Enhancement Tool (DPET). This tool is now deployed within three major MSO's.
